Physical Education, Human Development & Health

Physical Education and Health are core subjects within the Prep. to Year 10 curriculum. Students undertake study that focuses on the development of the body, mind and spirit.

In 2010 the Physical Education faculty continued to use a variety of teaching methodologies. A particular focus has been on 'game sense' or tactical learning. Whilst participating in modified games activities the students are instructed to focus on a tactical or strategic area. This focus broadens the students' understanding of game play and enables them to make better informed decisions when they move into full scale games.
