

## Management of Students at Risk of Anaphylaxis

This policy follows the authority provided in the Victorian Anaphylaxis Guidelines: A resource for managing severe allergies in Victorian Schools published by the Victorian Department of Education, and Ministerial Order No 706: Anaphylaxis Management in Victorian Schools, and was written in collaboration with **Allergy & Anaphylaxis Australia**.

### Source of Obligation

The Education and Training Reform Act 2006 (Vic) (s 4.3.1 (6)(c)) requires all schools to develop an anaphylaxis management policy, where the school knows or ought to reasonably know, that a student enrolled at the school has been diagnosed as being at risk of anaphylaxis.

'Ministerial Order No. 706: Anaphylaxis Management in Victorian Schools' prescribes specific matters that schools applying for registration and registered schools in Victoria must contain in their anaphylaxis management policy for the purposes of section 4.3.1 (6)(c) of the Act.

### The Hazard – Anaphylaxis

Anaphylaxis is the most severe form of allergic reaction. Individuals can have a mild, moderate or severe allergic reaction. Anaphylaxis is a severe, rapidly progressive allergic reaction that is potentially life-threatening. The most common allergies in school-aged children are peanuts, cow's milk, egg, tree nuts (e.g. cashews and walnuts), wheat, soy, sesame and certain insect bites and stings (particularly bees, wasps, ants and ticks).

The key to prevention of anaphylaxis in school is knowledge of students who have been diagnosed as at risk, awareness of allergies and prevention of exposure to those triggers that cause allergic reactions.

Partnerships between the College and parents/guardians are important in helping students avoid exposure as well as age-appropriate education for students.

Adrenaline given through an adrenaline (epinephrine) autoinjector (such as an EpiPen® or EpiPen® Jr) into the muscle of the outer mid-thigh is the first aid treatment for anaphylaxis. Adrenaline autoinjectors are designed for use by laypeople.

It is important to remember that minimisation strategies to help reduce the risk of anaphylaxis are everyone's responsibility, including the Principal and/or Vice Principal and all College staff, parents/guardians, students and the broader College community.

### Christian College Geelong's Policy

Christian College Geelong is committed to providing a safe learning environment for all our students and complying with Ministerial Order No. 706: Anaphylaxis Management in Victorian Schools, and the Department of Education and Training's Anaphylaxis Guidelines as amended by the Department from time to time.

The College recognises that while policies and procedures to reduce the risk of an allergic reaction can be developed and maintained, they cannot achieve a completely allergen-free environment.

It is critical that staff can recognise an allergic reaction and a potential anaphylaxis risk and treat it appropriately in an emergency.

It is our policy to:

- provide, as far as practicable, a safe and supportive environment in which students at risk of anaphylaxis can participate equally in all aspects of schooling
- raise awareness of food and insect allergy and the risk of anaphylaxis and the College's anaphylaxis management policy in the College community
- engage with parents/guardians of each student at risk of anaphylaxis when assessing risks and developing risk minimisation strategies for the student
- ensure that staff have knowledge about allergies, can recognise an allergic reaction including anaphylaxis and understand the College's policy and guidelines and emergency procedures in responding to anaphylaxis.

### Our Duty of Care

The College has a common law duty of care to put in place strategies to manage students at risk of anaphylaxis while they are at the College and engaged in College-related activities.

When a student is diagnosed as being at risk of anaphylaxis, the exercise of the College's duty of care requires the development of an Individual Anaphylaxis Management Plan, which includes an **ASCIA Action Plan for Anaphylaxis** (emergency response plan) and risk minimisation strategies.

Students at risk of allergic reactions, including anaphylaxis, could also be singled out or subjected to bullying behaviour within the wider College community. As part of our **Bullying Prevention and Intervention** policy, the College maintains an atmosphere of respectful relationships and actively develops and implements programs for bullying prevention, provides support for any student who is at risk of being bullied and empowers the whole College community to recognise and respond appropriately to bullying and behave as responsible bystanders.

### Safe Work Practices

College has developed the following work practices and procedures for managing the risk of anaphylaxis:

- **Individual Anaphylaxis Management Plans**  
(This plan includes Risk Minimisation Strategies)
- **Adrenaline Autoinjectors – Purchase, Storage and Use**
- **Communication Plan**
- **Emergency Response Procedures**
- **Staff Training**
- **Risk Management Checklist.**
- **Risk Management Plan - Camps & Excursions**
- **Strategies to Avoid Allergens**

Christian College Geelong has also developed a **flowchart** which outlines our practices for enrolled students or students presenting for enrolment.

### Risk Management Checklist

Each Head of Campus (or representative) completes an annual **Risk Management Checklist** included in the **Anaphylaxis Guidelines for Victorian Schools**, for their respective Campus, to monitor our obligations.

We regularly check the Department of Education and Training's **Anaphylaxis Management in Schools** page to ensure the latest version of the **Risk Management Checklist** is used.

### Roles and

The Principal and/or Vice Principal through the relevant Head of Campus is responsible for:

**Responsibilities:  
Principal and/or  
Vice Principal**

- ensuring that the College develops, implements and routinely reviews this policy in accordance with the Order and the Guidelines
- actively seeking information to identify students with allergies to food and insects for example, that have not been prescribed an adrenaline autoinjector and those who have been diagnosed as being at risk of anaphylaxis and been prescribed an adrenaline autoinjector, either at enrolment or at the time of diagnosis (whichever is earlier)
- conduct a risk assessment of the potential for accidental exposure to allergens while the student is in the care of the college
- ensuring that parents/guardians provide an ASCIA Action Plan which has been completed and signed by the student's medical practitioner and contains an up-to-date photograph of the student
- ensuring that an Individual Anaphylaxis Management Plan is developed in consultation with the student's parents/guardians for any student that has been diagnosed by a medical practitioner with a medical condition relating to allergy and the potential for an anaphylaxis, where the College has been notified of that diagnosis
- ensure students' Individual Anaphylaxis Management Plans are appropriately communicated to all relevant staff (including specialist staff, new staff, CRTs and office staff); this may include providing copies or displaying students' ASCIA Action Plan in first aid rooms, CRT folders, canteens and staffrooms
- ensuring that the canteen provider and all of its employees can demonstrate satisfactory training in the area of food allergy and anaphylaxis and its implications for food-handling practices; ensure the College canteens do not stock nut products. See **free online training for food service staff**
- when an external canteen provider is used, eg. Caterers on special occasions, ensure that the provider can demonstrate satisfactory training in the area of anaphylaxis and its implications on food handling practices
- ensuring that parents/guardians provide the College with an adrenaline autoinjector for their child that is not out-of-date and a replacement adrenaline autoinjector when requested to do so
- ensuring that an appropriate **Communication Plan** is developed to provide information to all College staff, students and parents/guardians about anaphylaxis and this policy
- ensuring there are procedures in place for providing information to College volunteers and casual relief staff about students who are at risk of anaphylaxis and their role in recognising an allergic reaction and responding to an allergic reaction, including anaphylaxis, of a student in their care
- ensure that, at all times when the student is under school supervision, including during excursions, camps, special event days, recess and lunch breaks, there are sufficient numbers of staff with up to date (within 3 years) training in Anaphylaxis
- ensuring that College staff who are appointed as College Anaphylaxis Supervisors are appropriately trained in conducting autoinjector competency checks and that their accreditation is current
- ensuring that all College staff are briefed at least twice a year by a College Anaphylaxis Supervisor (or other appropriately trained member of the College staff)
- allocating time, such as during staff meetings, at least twice each year, for the Anaphylaxis Supervisor (or other appropriately trained staff member) to lead discussion, review this policy and to practise using the trainer epipens and undertake drills to respond to anaphylactic attacks
- encouraging regular and ongoing communication between parents/guardians and College staff about the current status of the student's allergies, the College's policies and their implementation
- ensuring that the student's Individual Anaphylaxis Management Plan is reviewed in consultation with parents/guardians annually at the beginning of each school year, when the student's medical condition changes, as soon as practicable after a student has an anaphylaxis at the College, and whenever a student is to participate in an off-site activity such as camps or excursions or at special events conducted, organised or attended by the College
- provide or arrange post-incident support (eg counselling) to students and staff, if appropriate
- ensuring the **Risk Management Checklist** for anaphylaxis is completed and reviewed annually
- arranging to purchase and maintain an appropriate number of adrenaline autoinjectors for general use to be part of the College's first aid kit, stored with a copy of the **ASCIA Action Plan for Anaphylaxis** (Orange) for general use.

**Roles and  
Responsibilities:  
College  
Anaphylaxis  
Supervisor**

The College appoints appropriate College staff for the role of College Anaphylaxis Supervisor ('the Supervisor') (two are recommended).

A person should complete the College **Anaphylaxis Supervisors course** before being nominated the College Anaphylaxis Supervisor. The College Anaphylaxis Supervisor must complete the College **Anaphylaxis Supervisor Observation Checklist**, in conjunction with the relevant Head of Campus and other College staff to ensure that responsibilities, training requirements and tasks relating to anaphylaxis are being met by the College.

Christian College Geelong has appointed the following staff members as its Anaphylaxis Supervisors. Names of the particular staff appointed at each campus can be provided by the Heads/Deputy Heads of the respective Campuses.

Responsibilities of the College Anaphylaxis Supervisor/s include:

- working with the Principal and/or Vice Principal to develop, implement and regularly review this policy
- obtaining regular training on how to recognise and respond to anaphylaxis, including administering an adrenaline autoinjector
- verifying the correct use of adrenaline autoinjector (trainer) devices by other College staff undertaking online anaphylaxis training through completion of the College **Supervisors' Observation Checklist**
- providing access to the adrenaline autoinjector (trainer) device for practice by College staff
- sending reminders to staff or information to new staff about anaphylaxis training requirements and liaising with the Principal and/or Vice Principal to maintain records of training undertaken by staff at the College
- leading the twice-yearly anaphylaxis College briefing
- developing College-specific scenarios to be discussed at the twice-yearly briefing to familiarise staff with responding to an emergency situation requiring anaphylaxis treatment, for example a bee sting occurs on College grounds and the student with bee allergy is conscious, or an allergic reaction where the student has collapsed on College grounds and the student is not conscious
- organising anaphylaxis drills (not unlike a fire drill) in the College to practise getting an adrenaline autoinjector to a student requiring it quickly in an emergency
- working with parents/guardians (and students) to develop, implement and review each Individual Anaphylaxis and Allergic Reactions Management Plan in accordance with this policy
- providing advice and guidance to College staff about anaphylaxis management in the College and undertaking regular risk identification and implement appropriate minimisation strategies
- working with College staff to develop strategies to raise their own, students' and College community awareness about severe allergies
- liaise with the Campus Receptionist/Administration Staff to:

- keep an up-to-date register of students at risk of anaphylaxis;
- keep a register of Adrenaline Autoinjectors, including a record of when they are 'in' and 'out' from the central storage point. For instance, when they have been taken on excursions, camps etc;
- regularly (twice per year) remind parents to advise the school of any change to circumstance relating to diagnosis and treatment of medical conditions;
- remind parents, through the parent portal, to ensure that students emergency contact details are up to date;
- regularly check that the AAI is not cloudy or out of date and inform parents/carers if the AAI needs to be replaced;
- ensure that the AAI is stored correctly (at room temperature and away from light) and with a copy of the student's Anaphylaxis Management Plan (including the ASCIA Plan) in an unlocked, easily accessible place, and that it is appropriately labelled;
- ensure that a generic AAI is maintained at each campus for use in the event of an emergency or when a student with no history of anaphylaxis presents with symptoms.

**Roles and Responsibilities:  
Staff**

The responsibilities of College staff include:

- knowing and understanding the requirements of this policy
- knowing the identity of students who are at risk of anaphylaxis and knowing their face if possible
- understanding the causes, signs and symptoms, and treatment of anaphylaxis
- obtaining regular training on how to recognise and respond to an allergic reaction (including anaphylaxis), including administration of an adrenaline autoinjector
- knowing where to find a copy of each student's ASCIA Action Plan quickly and following it in the event of an allergic reaction
- knowing the College's general first aid and emergency response procedures and understanding their role in relation to responding to anaphylaxis
- knowing where students' adrenaline autoinjectors and the adrenaline autoinjectors for general use are kept
- knowing and following the individual risk minimisation strategies in the student's Individual Anaphylaxis or Allergic Reactions Management Plan
- planning ahead for special class activities (e.g. cooking, art and science classes), or special occasions (e.g. excursions, incursions, sport days, camp, cultural days, fetes and parties), either at school, or away from school
- working with parents/guardians to provide appropriate food for their child if the food the College/class is providing may present an allergy risk for them
- consider alternatives to food treats. If food treats are used, however, work with parents/guardians to provide appropriate treats for students at risk of anaphylaxis
- inform parents that some students have anaphylaxis problems and request that nut products be avoided in school lunches
- conduct Anaphylaxis Risk Assessments [**Risk Management Plans**] for excursions and camps including ensuring that the camp cook is able to demonstrate satisfactory training in food allergin management
- ensure that for an excursion or camp, all school staff members are aware of the identity of any students who are at risk, and know where the AAI and Anaphylaxis Management Plans are kept and how to access them
- develop, in consultation with the student's parents, a Risk Management Strategy for the students which is relevant to the circumstances of the particular excursion or camp
- ensure that the student's AAI, Individual Management Plan (including ASCIA Plan) and a mobile phone (or alternative) are taken on the excursion or camp
- being aware of the possibility of hidden allergens in foods and of traces of allergens when using items such as egg or milk cartons in art or cooking classes
- being aware of the risk of cross-contamination when preparing, handling and displaying food
- making sure that tables and surfaces are wiped down regularly and that students wash their hands before and after handling food
- raising student awareness about allergies and anaphylaxis, and the importance of each student's role in fostering a College environment that is safe and supportive for their peers.

**Roles and Responsibilities:  
Parents/Guardians**

The responsibilities of parents/guardians of students at risk of anaphylaxis include:

- informing the College in writing, either at enrolment or diagnosis, of the student's allergies, and whether the student has been prescribed an adrenaline autoinjector or not
- providing the College with an ASCIA Action Plan from the student's medical practitioner that details their condition, any medications to be administered, and any other relevant emergency procedures
- immediately informing College staff in writing of any changes to the student's medical condition and if necessary, providing an updated ASCIA Action Plan
- providing the College with an ASCIA (Australasian Society of Clinical Immunology and Allergy) Action Plan, or copies of the plan to the college that is signed by the student's medical practitioner and has an up to date photograph
- meeting with and assisting the College to develop the student's Individual Anaphylaxis or Allergic Reactions Management Plan, including risk minimisation strategies
- providing the College with an adrenaline autoinjector and any other medications that are current and not expired
- replacing the student's adrenaline autoinjector and any other medication as needed before their expiry date or when used
- assisting College staff in planning and preparation for the student prior to camps, field trips, incursions, excursions or special events (e.g. class parties, cultural days, fetes or sport days)
- if requested by College staff, assisting in identifying and/or providing alternative food options for the student when needed
- informing College staff in writing of any changes to the student's emergency contact details
- participating in reviews of the student's Individual Anaphylaxis or Allergic Reactions Management Plan
- ensure, for students who travel to and from school by bus, that he/she is carrying an AAI and a copy of the ASCIA Action Plan

- supply alternative food options for the student when needed
- inform staff of any changes to the student's emergency contact details
- participate in reviews of the student's Anaphylaxis Management Plan eg. when there is a change to the student's condition or when the student transfers to another campus.

NOTE: Students who do not have a valid AAI will not be permitted to attend the college until such time that one has been lodged with the campus administration staff.

**Staff Responsibilities**

All staff must follow the anaphylaxis management guidelines set out in this policy.

**Signage**

Copies of the ASCIA Action Plans are posted in the staff room and are located with first aid procedures as well as being in each student's medical kit with their adrenaline autoinjector/s.

With permission from parents/guardians (and older students), it may be appropriate to have a student's name, photo and the food/insect they are allergic to, displayed in other locations around the College.

**Implementation**

This policy is implemented through a combination of:

- college premises inspections (to identify wasp and bee hives)
- staff training and supervision
- maintenance of student medical records
- effective incident notification procedures
- effective communication with the student at risk and their parent/guardian
- completion of annual risk management checklist
- effective communication procedures with the school community including all students' parents/guardians
- initiation of corrective actions where necessary.

**Discipline for Breach of Policy**
